

For online students (not paper packet)

Students doing their 4th grade **curriculum online** for the remaining 5 week period will be using the educational website **studyisland.com**. The students have already been working in ELA (English Language Arts) and Math so they are familiar with the way it works. We are also adding the 4th grade Science and Social Studies curriculum to the program. This will be an effective, efficient, and organized way to continue learning for the remainder of this school year. The skills/concepts on this program are based on the Oklahoma Academic Standards that tell educators according to the State Department of Education what 4th grade students in Oklahoma need to learn. Students and I (and Mrs. Fehring) can message each other on this program, and I can monitor their progress online. We feel like this is the very best option for the 4th graders under these circumstances.

Each student needs to master 2 concepts/lessons/skills each week in each (4) subjects. English/Reading “ELA”, Math, Science, Social Studies

This info is in the bag of things we are sending home to each student on Monday 4*6*20

I sent home your GUM workbook and the remainder of your Studies Weekly booklets. These are optional for you to do if you are doing the online studyisland program (I hope you will!), but you do not turn these back into school.
